

Cookies

What are cookies?

Cookies are text and number files which are stored on your device. Cookies do not change, damage or install any programs on the device and are not in any way dangerous for your device.

Why do we use cookies?

Cookies are essential for a well working website. They can be essential for some type of services on our website and makes the website easier to use. Cookies are for example used when choosing the language. We use cookies for following up, development and improvement of our website.

Cookies do not tell us who visits our homepage, it only recognizes the browser. You can thus not be identified by cookies.

Can you influence the use of cookies?

The use of cookies can be prohibited fully or partly. It is also possible to delete cookies after a session in a way that the browser forgets the user. You can delete cookies from your computer before or after visiting our website. Some services on our website might not work correctly if you prohibit the use of cookies. There are many different ways to manage cookies depending on your web browser (Chrome, Safari, Firefox, Internet explorer etc.). You can get more information on the configuration of your web browser on the website of the manufacturer of the browser.
